

BBL: PRE & POST TREATMENT CARE

BBL™ Is A Proven Patient Favorite To Achieve Beautiful Skin!

BBL delivers light energy to gently heat the upper layers of your skin. The heat absorbed by the targeted areas will stimulate your skin cells to regenerate. In addition, the light energy penetrates deep into the skin to boost your body's natural ability to fight the appearance of aging. The result? Skin that's naturally beautiful and visibly younger looking! These pre-care and post-care instructions are intended to guide you through the treatment process and get you on your way to naturally beautiful skin!

What Should You Do Before Your Treatment?

- Use sunscreen and physical sun protection.
- Avoid extended sun exposure, i.e., beach, travel to sunny locations, sunbathing, sports outdoors.
- Inform your BBL clinician if any physician has ordered Accutane for you in the last 6 months.
- Inform your doctor of any medical conditions or medications you are taking that might sensitize you to light, affect wound healing or affect coagulation.

What Can You Expect During Your Treatment?

- The procedure is typically gentle and safe.
- There is no need for a topical anesthetic, however, your clinician may choose to use it.
- Your eyes will be protected with safety shields or glasses.
- You may briefly feel a warm or rubber band snap sensation as the light is absorbed.

What Should You Do After Your Treatment?

- You may experience some redness in the treatment area that should resolve within a few hours.
- You may notice darkening of your pigmented spots, followed by fading and flaking off at a later stage.
- Follow your clinician's aftercare plan until skin is completely healed – typically one week after the treatment.

The skin on your body might take longer to heal, compared to your face.

There is virtually no downtime after this non-invasive and gentle procedure. In most cases, you are able to apply make-up, return to work and resume most of your activities immediately.

PATIENT PRE & POST-CARE INSTRUCTIONS

TIPS & TRICKS

- Use soft wash cloth and towels to avoid any scrubbing.
- Wear a wide-brimmed hat or sun protecting clothing post treatment to avoid blistering, scarring, hyperpigmentation and hypopigmentation.

WATCH-OUTS

- If the treated area is especially warm within the first 12 hours after the treatment, a cold compress or ice pack can be used to provide comfort.
- If the skin appears red or swollen (sunburn sensation), an icepack can provide comfort, same as Vitamin E or Aloe Vera applied to the treatment area. In rare cases, oral pain relievers, i.e., Extra Strength Tylenol or Advil, may be used.
- While the skin is healing, avoid anything that will irritate the skin, such as exfoliants, shaving, too hot or too cold water and swimming pools and spas with multiple chemicals/chlorine.

WARNING

- In the unusual case of broken skin or blistering, contact the office immediately. Keep the affected area moist and avoid direct sunlight.

Skin Care Recommendations

The care for your skin pre and post treatment is just as important as the treatment itself. Alastin Skincare's post-care products are optimal due to being specifically designed to optimize recovery and enhance results following aesthetic treatments. Their formulas, featuring TriHex Technology, help support the skin's natural healing process by promoting the removal of damaged proteins and boosting the production of collagen and elastin. This leads to faster recovery, reduced redness and irritation, and better overall results. Additionally, the products are gentle, non-irritating, and suitable for all skin types, making them ideal for post-treatment care.

1. CLEANSING - Ultra Calm Cleansing Cream

AM/PM : Creamy cleanser that gently cleanses and calms skin, promotes hydration. Use your hands and fingertips to cleanse using gentle patting motions. DO NOT rub, scrub, use an exfoliant or skin care brush, such as a Clarisonic in the treated area.

2. TREAT - Regenerating Skin Nectar

AM/PM : Treatment helps prepare skin before a cosmetic treatment and reduce recovery time afterward.

3. MOISTURIZER - Ultra Light Moisturizer

AM/PM : Designed to enhance treatment outcomes by providing an optimal, healthy environment to improve skin's appearance following a cosmetic treatment. Moisturizer should be applied generously with clean hands over treated area and reapplied whenever your skin feels dry.

3. SUNSCREEN - SilkSHIELD

AM : All-Mineral Sunscreen SPF 30: Broad spectrum sunscreen that provides protection from UVA/UVB, IR rays, pollution and blue light. Sunscreen is a MUST and should be used daily beginning the day of treatment and used consistently. \Ensure to reapply during sun exposure. DO NOT expose your skin to direct sun exposure for 14 days. The treated area is more prone to sunburn and pigmentation change.
